Dear Mike,

Thank you for sending the information on ODFW's SbyC request for the Grande Ronde subbasin hatchery steelhead trout research. FPAC members have reviewed the request and there were no objections from any of the members. There were no conflicts that we could discern with other tagging studies.

Please regard this e-mail as concurrence from FPAC to proceed with the SbyC request and complete coordination with any remaining agencies as outlined in the SbyC request process on the PTAGIS website.

If you have any further questions please contact me.
