

PTAGIS Data  
Analysis:  
Transforming Raw  
Data into Research  
Insights

# PNAMP Fish Monitoring Work Group (FMWG)

The PNAMP Fish Monitoring Work Group supports collaboration and coordination among fish monitoring practitioners for effective monitoring and assessment methods and efficient data sharing. It also assists the Coordinated Assessments Partnership and StreamNet Program by facilitating discussions among data providers and reporting/decision makers related to fish monitoring data sharing and reporting needs.

Fish Data for the Northwest

# PIT Tag Array Data and Related Analyses Task

Document and recommend improvements to data management and analytical methods for PIT tag array data

- Identify and discuss tools to improve data management
- Discuss metadata storage options (e.g., methods for estimating site efficiencies and abundances in GitHub)
- Develop recommendations for large-scale application of PIT-tag array detection data and operations for reporting and modeling (e.g., run reconstruction, productivity, life-cycle, IMW)

Image: NOAA Fisheries

# What does this mean for you?

We are developing the task around the needs of the fisheries community.

Your input would help us identify issues and create a workflow to address the highest priorities.

Potential options:

- Workshops for hands-on training
- Webinars on analysis tools
- Resources for information-sharing

Where do we start?

PIT Tag Array  
Data and  
Related  
Analyses  
Issues

- Scan QR Code, by opening your phone and focusing on QR code until link pops up, click link
- Or try going to Slido.com and entering code PIT

Joining as a participant?

# Enter code here

Scan QR Code or go  
to Slido.com and  
enter code #PIT

\*We will try to display live results

If we cannot, you can see results on your device during polling

# Uses For PIT Tag Array Data

- **Abundance/escapement (adults and juveniles)**
- **Migration timing**
- **Survival**
- Age structure
- Genetic composition (sex, stock)
- Hatchery ratios
- Straying

# Primary Data Repository - PTAGIS

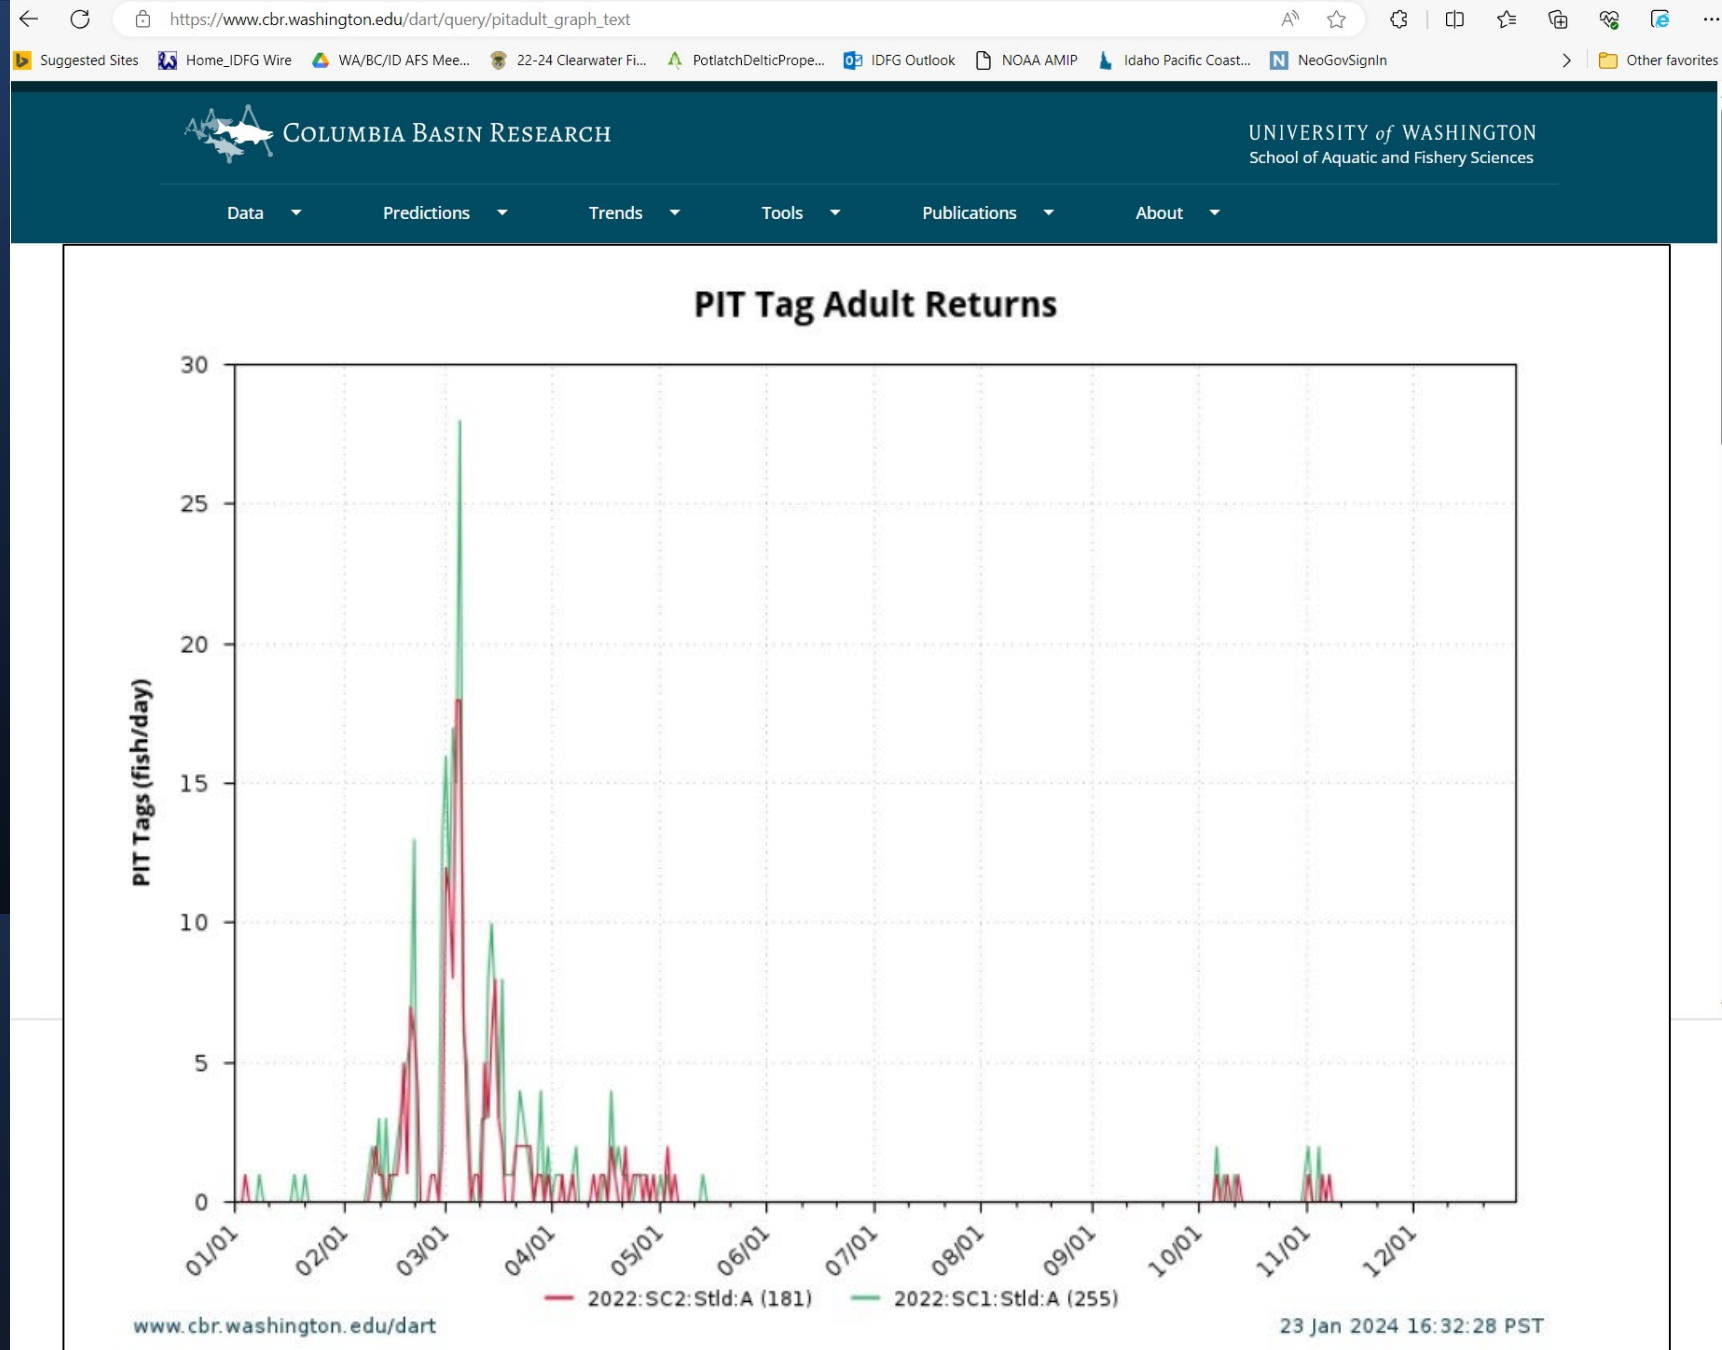

The screenshot displays the PTAGIS web application interface. The browser address bar shows the URL: <https://ptagisbi.ptagis.org/PTAGIS/asp/Main.aspx>. The page title is "PTAGIS BI > My Reports > qry\_PITArray\_AdultDetections\_Report".

The main content area is titled "18. Obs Site" and contains the following elements:

- INDEX:** A list of 36 items, with "18 Obs Site" selected. Other items include "Summary of your selections", "1 Select Attributes (Required)", "2 Select Metrics (Required)", "3 Mark Date", "4 Mark Capture Method", "5 Mark Data Project (used to be Coordinator)", "6 Mark File", "7 Mark File List", "8 Mark Site", "9 Mark Site Subbasin", "10 Mark Year", "11 Release Date", "12 Release Site", "13 Release Site RKM", "14 Release Site Subbasin", "15 Release Year", "16 First Obs Date/Time", "17 Last Obs Date/Time", "19 Mainstem Obs Site", "20 Obs Site RKM", "21 Obs Site Subbasin", "22 Obs Site Type", "23 First Obs Year", "24 Last Obs Year", "25 Species", "26 Run", "27 Rear Type", "28 Migration Year", "29 Stock", "30 Mark Length", "31 Mark Weight", "32 Tag Type", "33 Vial Code", "34 Tag Code - List or Text File", "35 Tag - Saved Report (INTERSECTION)", and "36 Tag - Saved Report (UNION)".
- Select one or more interrogation sites.**
- Search for:** A search input field with a magnifying glass icon and a "Match case" checkbox.
- Available:** A list of 486 sites, with "DHR - Henrys Instream Array" selected. Other sites include "15B - Fifteenmile Ck at Eightmile Ck", "15D - Fifteenmile Ck at Dry Ck", "15R - Fifteenmile Ck at Ramsey Ck", "18M - Eighteenmile Creek", "18N - 1890s Channel Methow River", "18C - Upper Big Creek, Yakima Basin", "11C - Upper Little Creek, Yakima", "1TC - Upper Tucker Creek", "2BC - Lower Big Creek, Yakima Basin", "2LC - Lower Little Creek, Yakima", "30M - Thirtymile Crk John Day Basin", "3D1 - Top of 3D Side Channel", "3D2 - Middle-1 of 3D Side Channel", "3D3 - Middle-2 of 3D Side Channel", "3D4 - Bottom of 3D Side Channel", "85M - Eightmile Ck at Fivemile Ck", "AB1 - Abernathy Creek FWS Tech Cntr.", "AB2 - Abernathy Creek Farmers Bridge", "AB3 - Lower Abernathy Creek", "AB4 - Abernathy Creek Hatch Channel", "ACB - Asotin Cr. at Cloverland Brdg.", "ACM - Asotin Creek near mouth", "AEN - Aeneas Creek Temporary Array", "AFC - No./So. Fk Asotin Cr. Jct. ISA", "AGC - Agency Creek, Lemhi R. Basin", "AH1 - Ahtanum at Lasalle HS", "ANR - Antoine Creek at AV Ranch", and "ANT - Antoine Creek Instream Array".
- Selected:** A list of 10 sites, including "LRL - Lower Lochsa River Array Site", "LRU - Lochsa River Upper Site", "CRA - Crooked River Array", "BBA - Big Bear Creek Array", "TAY - Big Creek at Taylor Ranch", "NFS - North Fork Salmon River", "LLR - Lower Lemhi River", "LRW - Lemhi River Weir", "HYC - Hayden Creek In-stream Array", "MAR - Marsh Cr at Lola Cr Campground", and "KRS - SF Salmon River at Krassel Cr.". Navigation arrows are visible between the "Available" and "Selected" lists.

At the bottom of the page, there is a "Report Message Name:" field containing "qry\_PITArray\_AdultDetections\_Report" and a set of buttons: "< Previous", "Next >", "Run Report", and "Cancel".

# Other Available Resources

# What Does it All Mean???

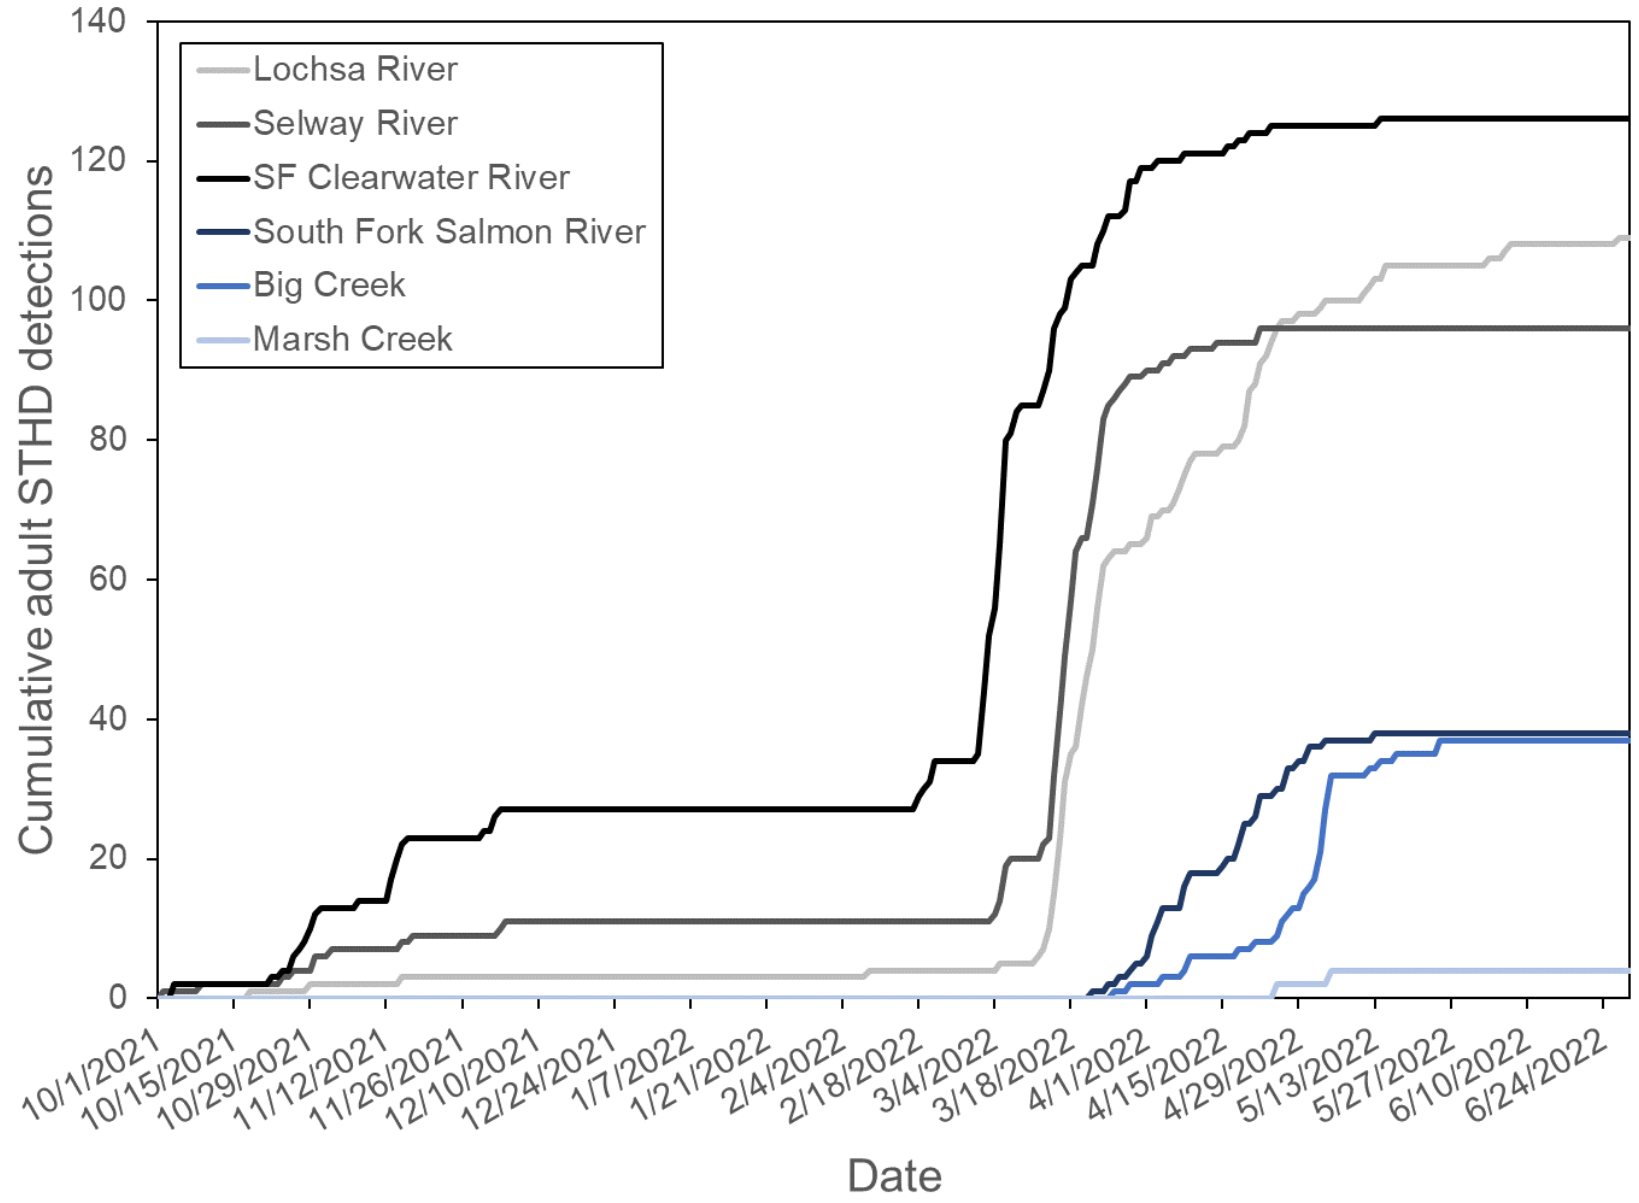

- Adult detections
- Upstream spawners versus kelts
- Which to include?
- Correctly identify spawn year

# Variation Among Populations

# Other Challenges

- What do PIT tags represent?
- Sample size limitations (PIT tags and detections)
- Inconsistencies with data storage
- How to store other associated data
  - Temperature
  - Flow
  - Detectability
  - Site or antenna outage
  - Site metadata
- Managing and making available the final products
- Different approaches to analyzing data

# South Fork Clearwater Adult Steelhead

Table 3. South Fork Clearwater River array summary for adult steelhead detections					
Location tagged	Life stage tagged	Lower array	Upper array	Both arrays	Total unique
<b><i>Wild-origin</i></b>					
Lower Granite	Adult	119	86	82	123
Lower Granite Passage & Survival Study	Juvenile	3	0	0	3

<b>Total</b>		<b>329</b>	<b>234</b>	<b>218</b>	<b>344</b>

# Lower Granite Dam

# Additional Information

- Handled at Lower Granite Dam
  - 222 hatchery adults
  - 44 wild adults
  - 71 unclipped hatchery adults
    - 64% of unclipped adults detected on SF and handled at LGR
- 81 additional adults not handled

Origin	Female	Male	Female %
Hatchery	122	82	60%
Wild	24	20	54%

Stock	Count
L. Clearwater	7
L. Snake	1
SF Clearwater	27
U. Clearwater	7
U. Salmon	2
